

*The new name for control*

# Calypso

## Permanent Control

The new name for permanent control is the Calypso aluminum louvre awning. This stylish contemporary louvre gives a fresh modern look to any area and the patented handle operation allows permanent positioning of the 70mm aero blades and not even the strongest wind will blow them open or shut. The flexible nature of the awning means that you can even place the control inside so there is no need to venture outside to adjust the blades.

The new Calypso is designed for installation to all areas both internal and external or as the ultimate answer to weather protection and privacy in outdoor areas such as patios and decks where it can even be installed with insect screens or security screens for added comfort and peace of mind.

# *Calypso Pergola*

Overhead Control

With the new Calypso Pergola, complete sun control is at your fingertips. Increase the comfort and practicality of any area by controlling the amount of shade, light and breeze as required. Hand operable to give infinite placement options, the Calypso Pergola is designed for flexibility to suit your lifestyle.

# SeaView

## Traditional Control

Come inside the feeling is comfort with the SeaView adjustable or fixed louvre awning. This versatile aluminium louvre awning uses the same 70mm aero blade while adjustment takes place by the more traditional means of a hand operated tilt bars fixed to the end of the blade so as not to interrupt the view.

Versatility and style walk hand in hand, and with the SeaView fixed blade louvre awning you have a more permanent answer to your privacy and ventilation needs. Comfort and good looks which won't stretch the budget.

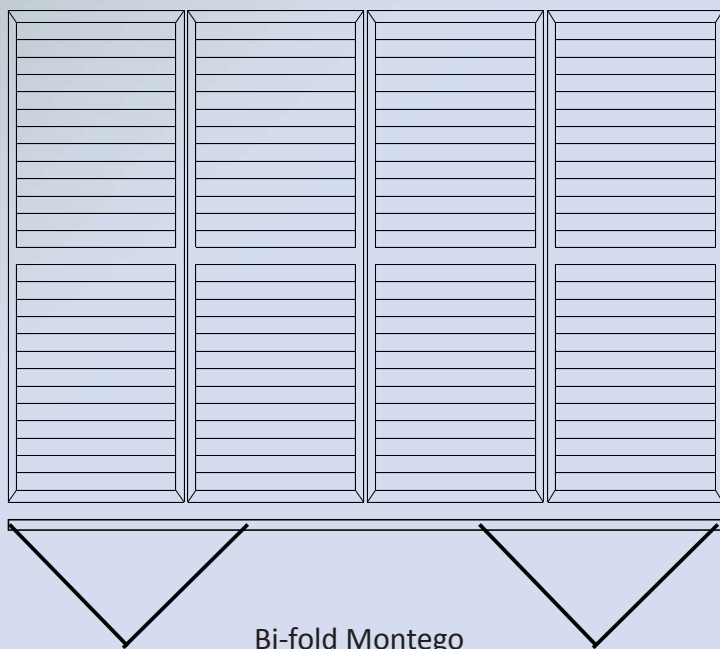

# Montego

## Flexible Control

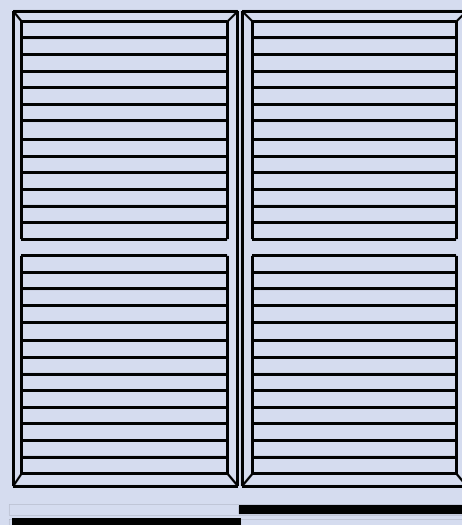

Whether it's bi-fold or sliding, the new Montego plantation style shutter gives a strength and versatility to match your lifestyle. The reinforced, mitred corner join means you can depend on Montego to give you years of trouble free operation. The smooth lines and 70mm aluminium aero blade give any area a modern, contemporary look which will remain fresh for years.

And with the Montego plantation shutters optional built-in insect screen, you can have the convenience and comfort of a pest free environment without the traditional tacked-on look of the unsightly after market fly screen.

Bi-fold Montego

Sliding Montego
