

No bars, no grilles

Just highly evolved security with a view

SECUREVIEW

highly evolved security

The no-compromise stainless security solution for Australia

Enjoy maximum security whilst retaining your view

SecureView is a proven high grade woven T316 black stainless steel mesh screen that delivers superior protection. It keeps intruders and insects out without spoiling your view.

SecureView is custom assembled by factory trained technicians into an extra strong aluminium frame to suit your exact home, office or commercial building specifications and incorporates the very best locking systems.

SecureView also has a full range of emergency escapes which can be top or side hinged.

Apart from the obvious safety aspect, they make cleaning your windows much easier.

As the name suggests, SecureView provides maximum security without sacrificing your view or blocking out breezes.

SecureView is available in a full range of configurations for residential and commercial applications including designs for:

- Sliding doors and windows
- Hinged doors
- Casement, awning and double-hung windows
- Fire and emergency escape screens
- Balustrades
- Pool fencing
- Outdoor room extensions
- Shop fronts

Enjoy maximum security whilst retaining your view

Super Strong

SERIES 310

SecureView's patent pending construction methods are designed to provide maximum strength, bonding the stainless steel mesh into the aluminium frame to minimize visual impact.

Blast Screens

SecureView BLAST SCREENS are designed and rigorously tested to minimize flying debris.

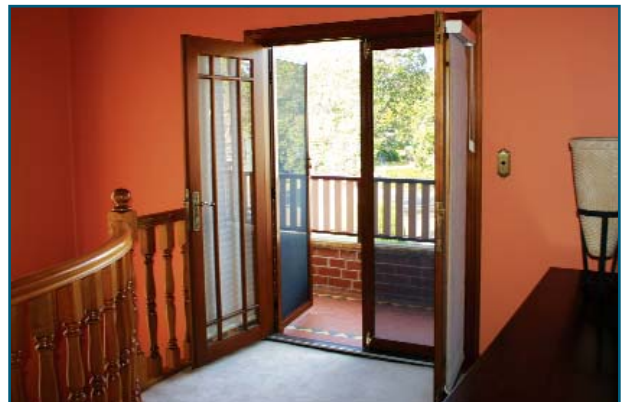

For the ultimate peace of mind, protect your family and property now!

Front door

Safety and a view

Timber effect entry doors

SecureView is Super Tough

The T316 marine grade stainless steel mesh used in SecureView is the same metal composition specified by performance yacht manufacturers on crucial fittings and cables.

Years of research and development by security experts has enabled SecureView to launch these class-leading designs on the market, backed by innovation that works.

SecureView is continually tested and passes the highest required standards including:

- Knife shear tests: AS5039 - 2003
- 1000 hour salt spray tests
- Impact tests: AS5039 - 2003
- Anti-jemmy tests: AS5039 - 2003
- Pull tests: AS5039 - 2003
- Aluminium frame specification: 6060 T5 powdercoated to a minimum thickness of 60um
- Stainless mesh specification: T316 Marine Grade, 0.8mm diameter, hardened for extra strength, 11x11 strands per 25mm (1 inch)

Great Colour Range

SecureView is available in a wide range of standard and custom colours selected to suit local market designs and architecture. The colours above are only an example of what we can do and the custom powdercoated colour range available is extensive.
